Maksim Pron

Backend Developer · C# / .NET · Python

Saint Petersburg, Russia · Telegram: @Red1ann · pron.max1m@yandex.ru · github.com/Red1an · red1an.github.io

Summary

Backend developer with 1.5 years of production experience. I build REST APIs and business logic on ASP.NET Core, design data models in PostgreSQL, integrate payment systems and CRMs, and run the infrastructure myself: Docker, deployments, CI/CD and production debugging on Linux. I clarify requirements, propose a solution and see it through to release. Looking to grow to middle level: high-load services, distributed systems, monitoring and testing. Open to office, hybrid or remote; full-time or internship.

Experience

Nordkroft — C#/.NET Backend Developer

06/2025 — present · B2C product startup, 5,000+ users, team of 4 · app.nordkroft.ru

- Own the product backend: two ASP.NET Core services on PostgreSQL (280+ endpoints, 50+ entities, 70+ migrations) — map and spots, reports, profiles, admin panel, bridge to the search ML service.
- Built authentication: JWT with refresh tokens, Yandex sign-in, email code verification, guest access.
- Integrated YooKassa and amoCRM: webhooks with server-side payment re-verification, in-app purchases, subscriptions with a background expiry checker; lead handoff to a partner's funnel.
- Built a service that collects reports from Telegram channels: real-time processing, a comparison queue, deduplication; admin backend with analytics and moderation.
- Photo handling: MinIO/S3, signed links with a limited lifetime, several image sizes.
- Infrastructure: 13 containers in Docker Compose on a VPS, Nginx, SSL, CI/CD on GitHub Actions deploying only changed services, backups, incident response.

C#, .NET 9, ASP.NET Core, EF Core, PostgreSQL, Redis, S3, Docker, Nginx, GitHub Actions

Projects

Baldezhny Zvuk — finalist, Vremya IT hackathon (SUAI × Zvuk), 10/2026

A shared playlist with ratings, swipes and ML recommendations. Backend lead: service structure, authentication, playlists and join modes, composite playlists, Docker + Nginx. Python, FastAPI, PostgreSQL + pgvector, WebSocket

Supplier matching for public procurement — RLT.Hack (Roseltorg), 10/2026

LightGBM ranking model trained on 600k lots: the actual winner lands in the top 10 for 53.5% of lots versus 31.4% for the baseline. Explainable search results, team coordination. Python, LightGBM, pandas, FastAPI

ReportBroker — github.com/Red1an/ReportBroker

A reporting service on Clean Architecture: RabbitMQ in, gRPC out, deduplication, Redis caching, unit tests. C#, .NET, RabbitMQ, gRPC, Redis, Docker

Achievements

- 2nd place — TechnoPiter accelerator, SUAI (12/2025)
- 3rd place, base track — Ya v Dele federal youth entrepreneurship program, season 9 (12/2025)
- Finalist — Tsifra national accelerator program (11/2025) and the Vremya IT hackathon (10/2026)
- Selected for the HSE FEST 2026 festival, HSE University, Saint Petersburg (03/2026)

Skills

Backend: C#, .NET, ASP.NET Core, EF Core, LINQ, gRPC, Clean Architecture, unit testing · Python, FastAPI, SQLAlchemy
Data: PostgreSQL, SQL, Redis, RabbitMQ, S3 / MinIO · **Infrastructure:** Docker, Nginx, Linux, CI/CD, GitHub Actions
Integrations: REST, JWT / OAuth, WebSocket, YooKassa, amoCRM · **ML:** pandas, scikit-learn, LightGBM, PyTorch

Education

SUAI (Saint Petersburg State University of Aerospace Instrumentation) — Applied Informatics, class of 2027. Courses: Fast C++ Start (PROTEI, 2026), Intro to 1C (NORBIT, 2026), Complete C# Masterclass (Udemy, 2023). English — B2.
